

Light Requirements

DelaDap! 2012

The following list, and light plot shows the perfect situation for us- we know that's not always possible to get what we want/need. Therefore it's important to get in contact with our light technician, to find the best solution for you and us.

Backtruss:

6x Mac 700 Spot (or similar)
4x Mac 700 Wash (or similar)
4x 6 Bars, Par 64 (LEE 106, 158, 119,NC)
3x Atomic 3000

Fronttruss:

6x 2K Fresnel
1x Profile (Center)
4x Mac 700 Wash (or similar)
2x 4light Audience Blinder

Floor:

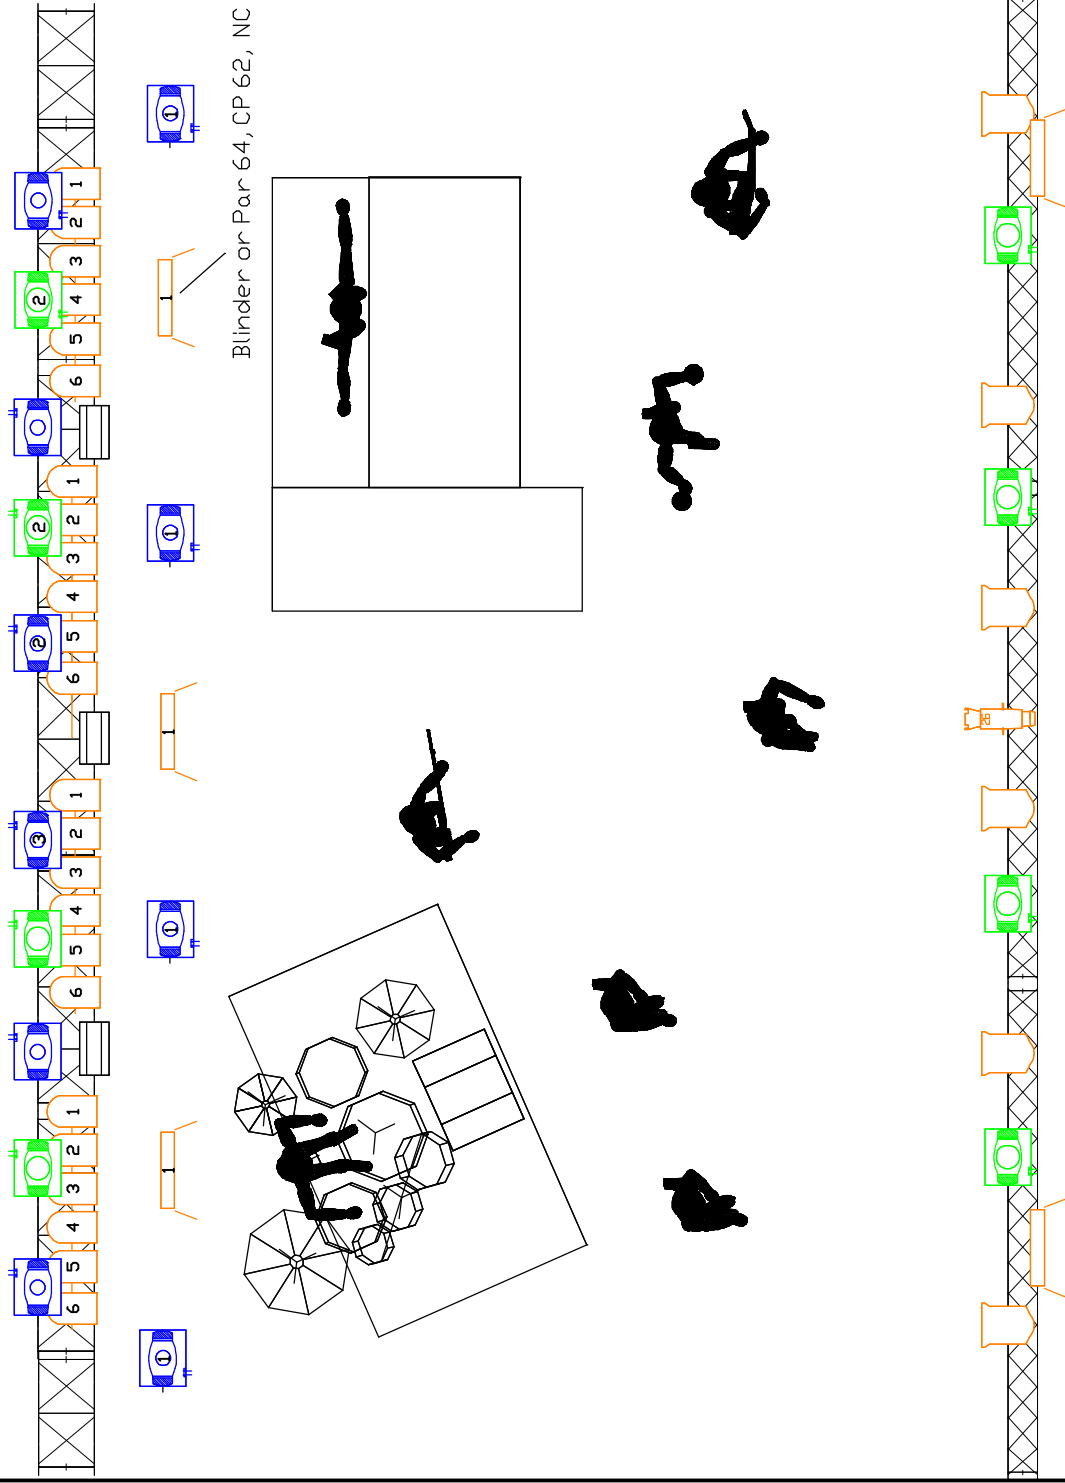

4x MAC 700 Spot
3x 4light Blinder or Par64 (CP 62), NC (single Channel)
2x Haze (NO FOG!)
2x Fan

We bring a Backdrop for the DJ Desk (1,20x2,40m)
We have NO lighting desk with us.
HOG 3, Road Hog, GrandMa1, GrandMa2 or Licon 1X are fine.

In any case there has to be an in-house light technician who knows the desk and the equipment.
The desk has to be patched and the lighting equipment has to be ready when we arrive.

Please get in contact with our Light Technician
Maria Doblhofer
Mail: office@thecase.at
Mobile: +43 650 55 77 999

The several numbers on the plot are NOT the patch addresses - so please ignore them
